OBJECTIVE

Full Stack Developer at Pictor with over 4 years of professional experience. Strong object-oriented programming skills with particular expertise in C# and .NET, as well as web development. Passionate about artificial intelligence, I am seeking to join a dynamic company where I can leverage my skills and contribute to innovative projects.

SKILLS

- **Programming Languages:** C#, Java, Python, JavaScript, PHP
- **Framework:** .NET, Angular, Laravel
- **Mobile:** Flutter, Android
- **Data Engineering:** Machine Learning, NLP, Web Scraping
- **Modeling Tools:** UML, PowerDesigner, StarUML
- **Databases:** SQL Server, MySQL, Oracle
- **Web Services:** REST API
- **Architectures:** N-Tiers, MVC, Clean Architecture, Design Patten
- **IDEs:** Visual Studio, Visual Code, IntelliJ IDEA
- **Development Methodologies:** Agile, Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer (.NET | Angular)

Pictor-Solution | May 2023 – Present

- Participated in defining and implementing database design and modeling processes.
- Developed innovative applications for clients using .NET 6 (backend) and Angular (frontend).
- Collaborated with the development team to solve technical issues.
- Contributed to CI/CD processes.
- Optimized application performance.

Technologies: .Net 6 WebApi, Entity Framework, SQL Server, Angular 14, Capacitor, Visual studio, Git

Full Stack Developer

Des-Click | June 2021 – April 2023

- Designed and developed new features for a project management application using C# and .NET.
- Managed projects from requirement gathering to final delivery.
- Conducted testing and validation on client environments.
- Delivered both corrective and evolutionary maintenance.

Technologies: Asp.Net Core WebApi, Entity Framework, SQL Server, Angular, visual studio

Intern - Development of a Chatbot for Individual Investors

Vermeg | February 2020 – October 2020

- Defined functional requirements in collaboration with the team.
- Designed and developed an intelligent chatbot using NLP and LSTM.
- Retrieved real-time market data and suggested investment products.
- Used Git and GitHub for version control.
- Collaborated with the team to ensure code quality.

Technologies: Python, Rasa Framework, Yahoo Finance API, Scrum

ACADEMIC PROJECTS

In my academic career, I developed:

- **Flight Management Application:** the user can add, delete, and modify pilot information, and also manage flight routes.

Technologies: ASP.NET WinForms with DevExpress, MySQL, Visual Studio

- **Web Application for Chemical Product Exchange (with unit and integration testing):** this application facilitates the exchange of chemical products between the faculty's laboratories.

Technologies: ASP.NET WebForms, SQL Server, Visual Studio

- **Desktop Application for Inventory and Invoicing:** allows adding, editing, and deleting items, and then creating and printing invoices based on those items.

Technologies: ASP.NET WPF, SQL Server, Visual Studio

- **Mobile App for Construction Site Budget Management:** it saves and tracks a site's expenses and credits, and notifies the user when an unpaid check due date is approaching.

Technologies: Flutter, SQLite, Visual Studio Code
